Install Gauge Carrier Lifting operations Moving / rotating equipment Minuscan Kimpact, dropped object) Moving / rotating equipment Moving / rotat	JOB SAFETT ANALYSIS (JSA) AND RISK ASSESSMENT (RA)	
Install Gauge Carrier • Lifting operations • Moving / rotating equipment • Manual Handling • Lifting operations • Moving / rotating equipment • Manual Handling • Lifting operations • Moving / rotating equipment • Manual Handling Installing gauge and cable and suspending TEC cable through sheave and suspending above rig floor • Lifting operations • Moving / rotating equipment • Lifting operations • Injury - Permanent disability (Slipping & Tripping, crush, dropped object) • Equipment damage – Huracan & / or Client (impact, dropped object) • Equipment damage – Huracan & / or Client (impact, dropped object) • Equipment damage – Huracan & / or Client (impact, dropped object) • Equipment object • Damage to plant & equipment • Manual handling alove rig floor • Injury, dropped object • Damage to plant & equipment • Manual handling alove rig floor • NPT - Delays to job • Interaction with other operating plant • Injury, dropped object • Damage to plant & equipment • Manual handling • Install gauge into gauge carrier and tighten • Connect TEC cable and cable head to gauge and mark and toque to 1-1/4 turns as per manufacturer's instructions • Experienced competent personnel / supervision • Ensure lifting equipment • Ensure lifting equipment • Installing gauge and mark and toque to 1-1/4 turns as per manufacturer's instructions • Experienced competent personnel / supervision • Ensure lifting equipment	off Only use no IECEx meters outside of hazardous areas. All other meters except for IECEx meters to be used outside of hazardous area. Ensure ongoing gas testing is performed. Ensure sheave checked	
Installing gauge and cable and suspending TEC cable through sheave and suspending above rig floor • Injury, dropped object • Damage to plant & equipment • Manual handling • Interaction with other operating plant • Injury, dropped object • Damage to plant & equipment • NPT - Delays to job • Injury, dropped object • Damage to plant & equipment • Connect TEC cable and cable head to gauge and mark and toque to 1-1/4 turns as per manufacturer's instructions • Experienced competent personnel / supervision • Ensure lifting equipment	Install Gauge Carrier • Lifting operations • Moving / rotating equipment • Manual Handling • Injury - Permanent disability (Slipping & Tripping, crush, dropped object) • Equipment damage - Huracan & / or Client (impact, dropped object) • Equipment (impact, dropped object) • Competent personnel operating rig tong, pick up gauge carrier and install on completion string and torque • Ensure personnel clear	Remote Major
• NEVER work under a suspended load	Installing gauge and cable and suspending TEC cable through sheave and suspending above rig floor - Lifting operations - Moving / rotating equipment - Manual handling - Interaction with other operating plant - Lifting operations - Moving / rotating equipment - Manual handling - Interaction with other operating plant - Injury, dropped object - Damage to plant & equipment, dropped object) - NPT - Delays to job - Lifting operations - Moving / rotating equipment & equipment other operating plant - Injury, dropped object - Damage to plant & equipment, dropped object) - NPT - Delays to job - Lifting operations - Moving / rotating equipment & equipment other operating plant - Injury, dropped object - Damage to plant & equipment & equipment other operating plant - Injury, dropped object - Damage to plant & equipment & equipment other operations of plant & equipment	

JOB SAFETY ANALYSIS (JSA) AI	ND RISK ASSESSMENT (RA)				HUR-LP-QH5E-FRMUT5-J5A & RA-V1.
Running In Hole with tubing and Gauge Cable • Moving / rotating equipment • Manual handling • Interaction wing other operating plant	g • Damage to TEC cable • Injury (Slipping & Tripping, crush, dropped object) h • Damage to plant &		or	C4	Good communication between driller, spool operator & man on floor. Controlled speed to help keep tubing away from potential snags Ensure no back tension on TEC cable while running in hole for first 4 joints Exclusion zone around spooler for authorised personnel only Slowly increase back tension on TEC cable as per SOP Ensure cable will not be crushed by rig slips Driller to have smooth operation on the brake
Installing Cross Coupling Protectors • Moving / rotating equipment • Manual handling	crushed fingers in cross	ly Possible	or Major	B4 MED	 hole Gloves for manual handling Experienced competent personnel / supervision Lifting equipment certified and current NEVER work under a suspended load Good communication between driller, spool operator & man on floor. Controlled speed to help keep tubing away from potential snags Hold meeting with rig personnel and discus presonnel and discus presonnel
Interaction wing other operation Flant	Damage to TEC cable	Likely	Major	High	job Use correct hand tool for specific cross coupling installation

Approved By: J. Hollingworth Signature: Jon Hollingworth Date: 18-Jan-23										

NOTE: Using the Risk Matrix below, identify the Consequence & Probability of each risk occurring and enter the risk score in the Inherent column. Review the consequence, probability and risk score after appropriate controls have been agreed upon. Remember, the consequence does not change unless you eliminate the hazard (only the probability may change!)
